Divyanshu Singh

Software Engineer | Full Stack Developer (React, Node.js) | AI & NLP Enthusiast

India | +91-7617639230 | divyanshus068@gmail.com | Github | LinkedIn

Innovative Full Stack Engineer skilled in React, TypeScript, and Node.js, with a focus on scalable SaaS development and frontend performance optimization. Experienced in building modular, maintainable systems that ensure data integrity and deliver intuitive, high-quality user experiences. Strong grasp of JavaScript fundamentals, software design principles, and cross-functional collaboration to create reliable, enterprise-grade solutions.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, Python

Frontend Development: HTML5, CSS3, Tailwind CSS, Responsive Design, Frontend Performance Optimization

Backend & Databases: RESTful APIs, MongoDB, PostgreSQL, Asynchronous Programming, System Design

Testing & Tools: Unit & Integration Testing, Git, GitHub, Docker (Basics), CI/CD, Redux, Zustand, Docker

Additional: Data Structures & Algorithms, SaaS Architecture, Figma, UI/UX, AI Integration (GPT, Gemini APIs)

EXPERIENCE

Full Stack Developer — *EVO-A Pvt. limited*
June 2025 - Nov 2025
Skills Used : Next.js, Typescript, API handling

- Built scalable, real-time chat architecture supporting multi-role AI interactions and streaming responses using React and Next.js.
- Improved response quality by 80% by dynamically managing system prompts and integrating Gemini API for context-aware replies.
- Optimized asynchronous API handling and state management, enhancing reliability and reducing latency in live chat operations.
- Wrote clean, modular, and maintainable code, enabling faster iterations and improved frontend performance at scale.

UI/UX Designer — *EVO-A Pvt. limited*
April 2025 - June 2025
Skills Used : Figma, UX Research, Interface Design, Wireframing, Prototyping

- Designed and documented a reusable Figma design system to improve scalability and design consistency.
- Created role-based user flows and high-fidelity prototypes, enhancing onboarding and user interaction efficiency.
- Collaborated with developers to maintain Figma-to-code accuracy and ensure responsive, production-ready UI delivery.
- Improved design usability and visual coherence through iterative testing and early feedback integration.

PROJECTS

IZARA - AI
Skills Used : React.js, Express.js, Tailwind CSS, API handling, Interface Design

- Integrated GPT-4.1 with a custom Express.js backend to deliver intelligent, real-time AI chat functionality
- Built a high-performance frontend using React.js, Tailwind CSS, and Vite, ensuring a smooth and responsive user experience.
- Implemented secure API handling and environment configuration using dotenv for production readiness.
- Enabled markdown rendering and real-time state updates to support dynamic, AI-driven conversations.

WEB3 BANKING D'APP – Decentralized Finance Platform
Skills Used : React.js, Tailwind CSS, Internet Computer Protocol, Motoko, Web3 Authentication

- Developed a decentralized banking platform on the Internet Computer Protocol (ICP) using smart contracts in Motoko.
- Implemented token faucets, NFT minting, and balance tracking with real-time frontend integration.
- Built a responsive Web3 interface using React.js and Tailwind CSS, ensuring seamless blockchain interaction.
- Integrated Internet Identity authentication for secure, decentralized user access without traditional credentials.

ACHIEVEMENT

- Led a 3-member development team at EVO-A to build and deliver the MVP, successfully showcased to potential investors.
- Designed scalable AI chat architecture used in the production MVP at EVO-A, integrating LLMs (GPT, Gemini) for context-aware dialogue evaluation and optimization.

EDUCATION

Mahatma Jyotiba Phule Rohilkhand University

B.Tech, Computer Science & Information Technology (CSIT)

2022 - 2026

Kendriya Vidyalaya N.E.R

Senior Secondary (Class XII), CBSE – Science Stream

2021 - 2022

COURSEWORK

- **The Complete Full-Stack Web Development Bootcamp** - *by Angela Yu (Udemy) - Completed*
- **Decoding DevOps – From Basics to Advanced Projects with AI** - *by Imran Teli (Udemy) - Ongoing*
